

Curriculum Vitae – Christos Eleftheriou

Contact information:

Name : Christos Eleftheriou
Address : Agias Sofias 7, Larnaca
Mobile : +359 878 666 471
Date of Birth : 11th of October 1996
Email : cozilas@gmail.com
Website : www.cozilas.com

I am an enthusiastic and analytical Information Science graduate with two years of industry experience as a software developer. In my most recent role, I utilized multiple programming languages (C++, C, and Python) on a daily basis, while working on large-scale projects for industry leaders, primarily in the field of digital cameras and software production. I have a genuine passion for my field of work and look forward to developing my experience as a programmer further. In my spare time, I enjoy working on personal projects that allow me to get creative and explore a diverse range of software development technologies.

Educational background:

2018 – 2022 **New Bulgarian University** **Sofia, Bulgaria**
Bachelor of Information Technology

2008 - 2014 **Med High Private English School** **Larnaca, Cyprus**

Skills	Programming languages
Software Development	C++
Algorithms	C
Embedded Systems	C#
Game Development	Python
Linux / Windows	HTML / CSS / Java Script
Git	Java
Digital Art / 3D Modeling	

Languages:

- Native Greek
 - Fluent English
 - Fluent Bulgarian
-

Professional Experience:

Software Developer MM Solutions JSC | July 2022 – November 2024

- Developed software for digital cameras.
- Collaborated with teams from various departments to design and implement new features.
- Worked on projects for industry leaders such as Qualcomm and Leica.
- Conducted code reviews and provided constructive feedback to peers.
- Leveraged multiple programming languages.
- Operated in a Linux-based development environment.
- Utilized Git for collaborative development and version control.
- Debugged and troubleshooted software issues.
- Enhanced system performance through code optimization and algorithms.
- Used developer kits to test and validate software functionality.
- Collaborated with QA teams to ensure software quality and reliability.

Customer service agent Swissport International | 2018 - 2019

- Operated computers and airline specific software.
- Assisted passengers as needed through arrival and check in processes including support for passengers with special requirements.

Refugee Project – Caritas Sofia and CVS – Bulgaria | January 2019 - August 2019

I volunteered at a refugee camp, teaching IT skills to children aged six to eighteen. Before and during my time in this role, I received training from the charity organization Caritas on how to work with vulnerable individuals. This training also covered teaching methodologies and teamwork skills.

Military Sergeant National Guard of Cyprus | July 2014 - July 2016

I completed Military Police training, gaining expertise in law enforcement, security operations, and emergency response. Throughout my training, I acquired skills in conflict resolution, de-escalation techniques, and the execution of security operations, including perimeter control.

Erasmus Project – Saint-Pierre-d'Oléron | September 2023

I was selected to participate in the “Youth for a Green Future” project in France, which aimed to bring together a diverse team from across Europe to encourage advocacy for environmental issues.

Kite Surfing Instructor at Kahuna Surf house – Larnaca, Cyprus

As a kitesurfing instructor, I fostered a supportive environment that helped students build confidence and tackle the technical challenges of the sport. This experience honed my patience, adaptability, and clear communication skills, which I continue to leverage in my professional life.

Personal projects:

Designed and developed cozilas.com, my personal portfolio website, to showcase my skills and projects in software development. Utilized modern web technologies to create a responsive, visually engaging site that highlights my work and achievements.

Developed timelessgraceaesthetics.com, for a company based in Ipswich, England, specializing in aesthetic procedures. The site features a responsive design and an intuitive interface that allows users to navigate through the various services offered by Timeless Grace. A key component of the project was integrating a seamless booking system, enabling clients to schedule appointments.

Developed and currently managing an e-commerce website called waterfilternet.com, where I oversee both the search engine optimization (SEO) and the overall management of the orders. My role includes optimizing the site to improve its visibility in search engines, ensuring that the content aspects align with SEO best practices. In addition, I handle strategic decision-making, marketing initiatives, customer relations, and ensuring the smooth operation of the business.

One of the projects I am proud of is my mobile game called [Duck Ventures](#). This project expanded my skill set beyond my degree, as I served as the sole programmer, digital artist, animator, and game designer. Overcoming various challenges during development provided me with a holistic understanding of game development and deepened my appreciation for how programming complements other disciplines to create a cohesive game. The game is currently available on the Google Play Store.
